Foreword

Crime is of great concern to all citizens of Virginia. By use of crime statistics, criminal justice agencies can make an informed decision concerning the most efficient and effective manner in which to dedicate their limited resources toward the reduction of crime in their communities. The Uniform Crime Reporting (UCR) Program is a system of collecting and analyzing crime statistics gathered on selected crimes by participating law enforcement agencies throughout the State. We acknowledge the efforts made by these agencies in making this report accurate and concise.

With this publication, all information is in the Incident Based format. The Incident Based Reporting central repository went into production in January 1994. At that time all contributing agencies were given five years to convert their summary system into an incident based system. All but a few agencies have completed this process and we are no longer accepting summary hard copy reports. In the section, Offenses By Contributor, if the agency did not submit an entire year of data, the footnote beside the agency's name represents the number of months of submission. The statewide population for this publication, 7,293,500, are 2002 provisional estimates provided by the Weldon Cooper Center For Public Service, University of Virginia.

In accordance with the *Code of Virginia*, the Department of State Police, as the central repository, collects crime information from participating agencies; the most accurate information available in Virginia is used to generate the statistics contained in this publication. UCR statistics were originally for police agencies only, but community concern has generated a use by both public and private sources. This use increases yearly. The UCR information has become the primary vehicle used to evaluate levels of criminal activity in jurisdictions throughout Virginia.

The participation and cooperation of all agencies making this publication possible is sincerely appreciated. The quality of the program continues to be maintained through their cooperative efforts.

Clearance Rates:

This report no longer publishes clearance rates. The IBR system does not accurately reflect the volume of clearances each department produces in a given year. Additionally, the number of arrests in a jurisdiction does not provide offense clearance information in that one person arrested could clear a number of different offenses.

Virginia Uniform Crime Reporting Program

HISTORY

Development of the nationwide summary Uniform Crime Reporting (UCR) Program began seventy years ago. In 1930, crime counts were first requested from local police departments, with the Federal Bureau of Investigation designated by Congress to collect, compile, and analyze these statistics. The Committee on Uniform Crime Records of the International Association of Chiefs of Police played a primary role in the origin and development of the UCR Program and, to this day, serves in a strong advisory capacity. The National Sheriff's Association (NSA) in 1966, established a Committee on Uniform Crime Reporting to serve in an advisory capacity to the NSA membership and the national Uniform Crime Reporting Program. Today, this Committee and similar committees within the state law enforcement associations are active in promoting interest in the UCR Program. Standardized offense classifications and scoring procedures to insure uniformity and consistency of data were the keynote of the reports. All of the Uniform Crime Reports were designed to be a by-product of information that a law enforcement agency should routinely compile for its own efficient administration and performance. The underlying philosophy and focus is and always has been oriented toward police statistics for use by law enforcement agencies, but the unique nature of the program makes the data invaluable for use by elected officials and the American public.

The FBI has actively assisted individual states in the development of statewide programs of police statistics compatible with the national system. These state statistical programs provide the advantage of increased coverage of law enforcement agencies due to mandatory reporting requirements. State systems also provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state collection agency, the data is available for use by the state, and the collection and reporting machinery for the national program is substantially streamlined.

Prior to June 30, 1974, no mandatory uniform crime reporting law existed in Virginia, and of the 288 agencies in the Commonwealth, 162 or 56% were voluntarily reporting directly to the Federal Bureau of Investigation. Effective law enforcement requires the coordinated action of all law enforcement agencies within and among political subdivisions. Special attention must often be devoted to a selective and concentrated effort both area wide as well as in terms of a specific pattern and type of criminal behavior. Selective and coordinated enforcement becomes possible only when the type and volume of crime can be analyzed on a basis of accurate information, statistically developed and coordinated.

The need for statistical information on the number of offenses and offenders was long recognized in the state. The system developed in Virginia gave vital information that assisted law enforcement agencies throughout the state by furnishing information for management decisions and planning programs. Virginia has now converted to a more extensive data collection system. This new system is discussed on the following page.

A statewide UCR program informs the Governor, Legislature, local and state law enforcement agencies, other governmental officials, and the public as to the nature of crime problems in Virginia, their magnitude, and their trend over a period of time. Local and state officials are able to assess the direction and impact of crime through the collection of timely and reliable statistical information.

UCR SYSTEM OBJECTIVES

The fundamental objectives of the Virginia Uniform Crime Reporting Program are:

- (1) To inform the Governor, Legislature, and other governmental officials, and the public as to the nature of the crime problem in Virginia—its magnitude and its trend.
- (2) To provide law enforcement administrators with criminal statistics for administrative and operational use.
- (3) To determine who commits crimes by age, sex, race, and other attributes in order to find the proper focus for crime prevention and enforcement.
- (4) To provide base data and statistics to measure the workload and effectiveness of Virginia's criminal justice system.
- (5) To provide base data and statistics to measure the effects of prevention and deterrence programs.
- (6) To provide base data and statistics for research to improve the efficiency, effectiveness and performance of criminal justice agencies.
- (7) To provide base data to assist in the assessment of social and other causes for the development of theories of criminal behavior.

Incident Based Reporting

THE INCIDENT BASED REPORTING SYSTEM

Virginia is now publishing crime data in a different format. This new reporting system is the Incident Based Reporting System. The Incident Based Reporting (IBR) system was designed to meet law enforcement needs well into the new millennium. The following information is furnished to provide an overall description of IBR.

During the preliminary development of IBR by the Federal Bureau of Investigation, advice was solicited from the National Association of State UCR programs, the International Association of Chiefs of Police, the National Sheriffs' Association, the National Alliance of State Drug Enforcement Agencies and other federal, state and local criminal justice agencies.

The guidelines and specification developed were provided to South Carolina for testing in a pilot program in 1987. As a result of the testing, further refinements were made. In 1988, a national conference was held to present these guidelines and obtain feedback from representatives of law enforcement agencies in attendance. While the consensus was that the Federal Bureau of Investigation should proceed with efforts to implement this system nationally, additional suggestions concerning this program were submitted.

Virginia formed a State UCR Committee in 1986 to follow the developments of the IBR and to evaluate its impact on our state. This committee was composed of representatives from the Virginia State Sheriffs' Association, the Virginia Association of Chiefs of Police, the Department of Criminal Justice Services, and the Department of State Police. The State UCR Committee created the UCR Forms Subcommittee, which included representatives from police and sheriffs' agencies, the State Police, and the Department of Criminal Justice Services. This subcommittee developed, tested and subsequently recommended a standard Incident Based Reporting form for use in Virginia. The Forms Subcommittee recommended this form be used at the option of the reporting agencies. However, agencies may use their own form to report the required data to the central repository. It is important, at this point, to recognize that this form is used to *collect* the various data concerning criminal activity. Because of the numerous data elements collected, law enforcement agencies *report* this data to the central repository via an automated system.

The UCR Committee recommended that the Superintendent of the Department of State Police adopt the minimum, mandatory data standards recommended by FBI/UCR and proceed with the implementation of Incident Based Reporting in Virginia. In addition, the committee recommended that the data be collected which would relate the offender to the offense, the type of property security/alarm system used, and the method/direction used by the offender to flee the scene. Additional data is collected on Officer Assaulted/Killed Reports relating to the types of activities and assignments the officer was performing at the time of the offense.

Some of the major benefits derived from the IBR system are greater specificity in reporting; more correlation between offenses, property, victims, offenders, and arrestees; expanded victim/offender relationships; distinction between attempted and completed crimes; and increased reporting of various circumstances relative to specific crimes.

The IBR system requires that extensive data be reported for *each crime* occurring during a particular incident. Under the old summary system, only limited data concerning the *most serious crime* occurring during a particular incident was reported.

Information relating to two different levels of offenses are collected by the IBR system. The most serious offenses are designated as Group "A" offenses; the less serious offenses are designated as Group "B" offenses. Group "A" offenses consist of 22 categories of crimes involving 46 different offenses; a maximum of 10 offenses per incident may be reported. Agencies are required to report 75 data elements for each Group "A" offense. Group "B" offenses, consisting of 11 crimes, only require reporting arrest data and the identification of the case and reporting agency.

The new offense categories along with their definitions are provided on page six.

Crime Factors

Crime trends vary from place to place; thus, a review of the statistics and comparison of data should be done with caution. While the causes and origins of crime have been the subject of investigation by many disciplines, *Crime in Virginia* restricts itself to population size alone to establish a crime rate.

Some factors believed to affect the type and volume of crime in various places are:

1. Population size, density and degree of urbanization;
2. Population variations in composition and stability;
3. Economic conditions and employment availability;
4. Mores, cultural conditions, education, and religious characteristics;
5. Family cohesiveness;
6. Climate, including seasonal weather conditions;
7. Effective strength of the police force;
8. Standards governing appointments to the police force;
9. Attitudes and policies of the courts, prosecutors and corrections;
10. Citizen attitudes toward crime and police;
11. The administrative and investigative efficiency of police agencies and the organization and cooperation of adjoining and overlapping police jurisdiction;
12. Crime reporting practices of citizens.

Group A Offenses

Definitions of Categories of Group A Offenses

For practical purposes of measuring the trend and distribution of crime on the National and State level, the definitions for crime in the Incident Based Reporting (IBR) Program are generic in order not to exclude varying state and Federal statutes relating to the same type of crime. The definitions which were developed for IBR are not meant to be used for charging persons with crimes. Essential to the maintaining of uniform and consistent data is the establishment of standard definitions which are used for the State and National Programs.

The IBR Group A Offense Categories and their definitions are:

Justifiable Homicide

The killing of a perpetrator of a serious criminal offense by a peace officer in the line of duty; or the killing, during the commission of a serious criminal offense, of the perpetrator by a private individual

As a general rule, any death due to injuries received in a fight, argument, quarrel, assault, or commission of a crime is classified in this category. Suicides, accidental deaths, assaults to murder, traffic fatalities, and attempted murders are not classified as Murder/Nonnegligent Manslaughter. More information on murders may be found in the violent crime section of this report.

In 2002, the contributing agencies reported 343 offenses resulting in 379 actual deaths. An analysis by month shows September had the greatest occurrences.

Murder/Nonnegligent Manslaughter

In all cases of murder reported under this system, data is captured on the victim and suspected offender's age, gender, and race. The data below represents victim information for the murders reported by the agencies submitting Incident Based Reporting data.

The unlawful entry into a building or other structure with the intent to commit a felony or a theft

A “structure” is considered to include, but not be limited to, all buildings, railroad car, garage, housetrailer or houseboat if used as permanent dwelling, room, barn, stable, mill, and ship.

Offenses locally known as burglary (any degree); unlawful entry with intent to commit a larceny or felony; breaking and entering with intent to commit a larceny; and housebreaking are classified as burglary.

Thefts from telephone booths, coin-operated machines, automobiles, tents, or shoplifting from commercial establishments are classified as larcenies and are not included in this offense

There were 30,671 burglaries reported by the contributing agencies. The month of July had the greatest occurrence of burglaries.

Larceny

The unlawful taking, carrying, leading, or riding away of property from the possession, or constructive possession, of another person

Pocket-picking

The theft of articles from another person's physical possession by stealth where the victim usually does not become immediately aware of the theft

Purse-snatching

The grabbing or snatching of a purse, handbag, etc., from the physical possession of another person

Shoplifting

The theft, by someone other than an employee of the victim, of goods or merchandise exposed for sale

Theft From Building

A theft from within a building which is either open to the general public or where the offender has legal access

Theft From Coin-Operated Machine or Device

A theft from a machine or device which is operated or activated by the use of coins

Theft of Motor Vehicle Parts or Accessories

The theft of any part or accessory affixed to the interior or exterior of a motor vehicle in a manner which would make the item an attachment of the vehicle, or necessary for its operation

All Other Larceny

All thefts which do not fit any of the definitions of the specific subcategories of Larceny/Theft listed above. Included are thefts from fenced enclosures, boats, and airplanes. Theft of animals, lawnmowers, lawn furniture, hand tools, and farm and construction equipment are also included where no break-in of a structure is involved.

Local offense classifications such as grand theft, petty larceny, or felony larceny have no bearing on the fact that each distinct operation of larceny is reported as one offense.

Motor vehicle theft is not included in the larceny totals and is counted separately because of the great volume of such thefts

There were 175,997 offenses reported by the contributing agencies during 2002. July had the greatest occurrence of offenses reported.

Larceny

The nature of larceny, a crime of opportunity, sneak thievery and petty unobserved thefts, makes it an extremely difficult offense for law enforcement officers to solve. A lack of witnesses and the volume of these crimes work in the offender's favor.

Hate Crime

Hate crimes are not separate distinct offenses, but rather traditional crimes motivated by the offender's bias. Because of the difficulty of ascertaining the offender's subjective motivation, bias is reported only if investigation reveals sufficient objective facts to lead a reasonable and prudent person to conclude that the offender's actions were motivated, in whole or in part, by bias against race, religion, disability, ethnicity, or sexual-orientation.

Arrest Data

2002 Arrest Data

Arrest statistics reflecting characteristics of persons arrested by age, gender, and race are collected monthly from contributing law enforcement agencies. In examining arrest figures it is important to remember they do not personally identify individuals arrested but represent the total number of persons arrested. One person may be arrested several times during a year for the same type of crime or for different offenses. Each arrest would be counted. When a person is arrested and charged with several offenses, only one arrest is counted. Furthermore, arrest figures cannot be compared to offense figures because several persons could be arrested for the same offense, or the arrest of one person may solve several offenses. Arrests are primarily a measure of police activity as it relates to crime. Although law enforcement arrest policies vary, particularly with respect to juveniles, contributors to this program are instructed to count one arrest each time an individual is taken into custody for committing an offense. A juvenile is counted as a person arrested when he commits an offense and the circumstances are such that if the offender were an adult, an arrest would be made.
